

NEW

bema 11 MultiClean / bema 6 MultiClean

MULTIFUNCTIONAL USE

Powerful and cost-effective alternative to sweepers

The redesigned bema 11 MultiClean push broom impresses with even greater robustness and durability. As an optional feature, the new bema push broom is available with practical side booms. For smaller vehicles and areas, the bema 6 MultiClean is now available as a compact and swivel-mounted version. This makes cleaning even more flexible and efficient!

FEATURES

- ✓ **For every carrier vehicle, the suitable push broom - two models with 4 and 3 working widths:**
11 rows of PPN bristles with a bristle height of 280 mm, or a lighter and more compact version with 6 rows of bristles.
- ✓ **Versatile in use:**
Suitable for various types of dirt and tasks, such as mud, gravel, corn, silage, sweeping up gravel and sand or snow clearing. Three versions are available: fine bristles, coarse bristles, or a mix of fine and coarse bristles.
- ✓ **Comfortable to handle & maintenance-free:**
Attaching and detaching from the carrier vehicle is quick and easy. Only two/four screws need to be removed to replace individual rows of bristles.
- ✓ **NEW 2025 - fully galvanized design for a long service life:**
Re-engineered model range with very stable construction prevents warpage even with large working widths and under extreme loads.
